PRODUCT CONCEPT / OCTOBER 2026

FREQ

BY PORTO LABS

Put your phones together.
The room builds its own set.

THE PROBLEM

AI music generation is not social.

FREQ brings the moment back into the room.

A shared room

Six people.
One evolving set.

06

PEOPLE / ONE ROOM

The engine blends the room's tastes and selects what plays next.

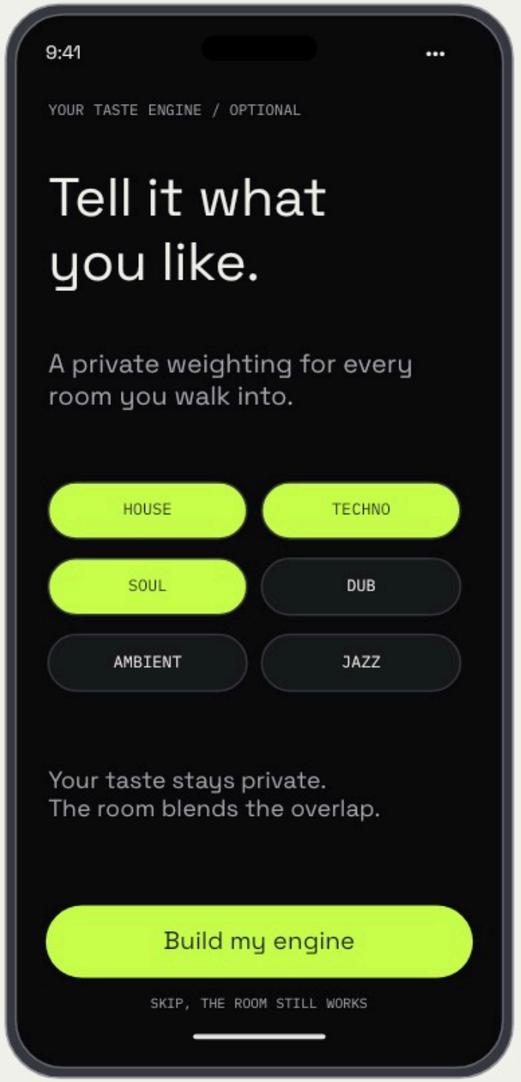

Concept: up to six phones. The set plays without pause, skip or scrub.

Start with who’s here

Open a room without an account.
Add your taste if you want to.

Your preferences stay private.
The shared set comes from
the overlap.

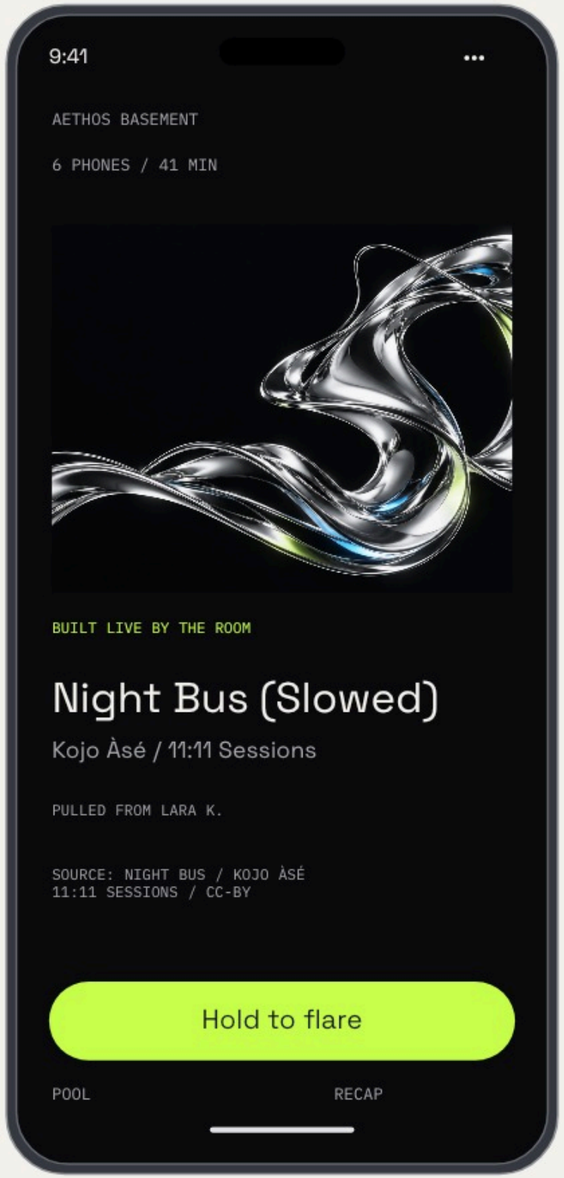

Match my FREQ

Bring your phones together.
Find a shared frequency.

TWO PHONES. ONE MOMENT.

Let the set unfold

Every track gets its moment.
The room listens together.

Original artist, source track and contributor remain visible.

Touch the room

Three gestures. The music keeps playing.

Tap

Join. Choose. Open.

Drag

Thicken the visualiser.

Hold

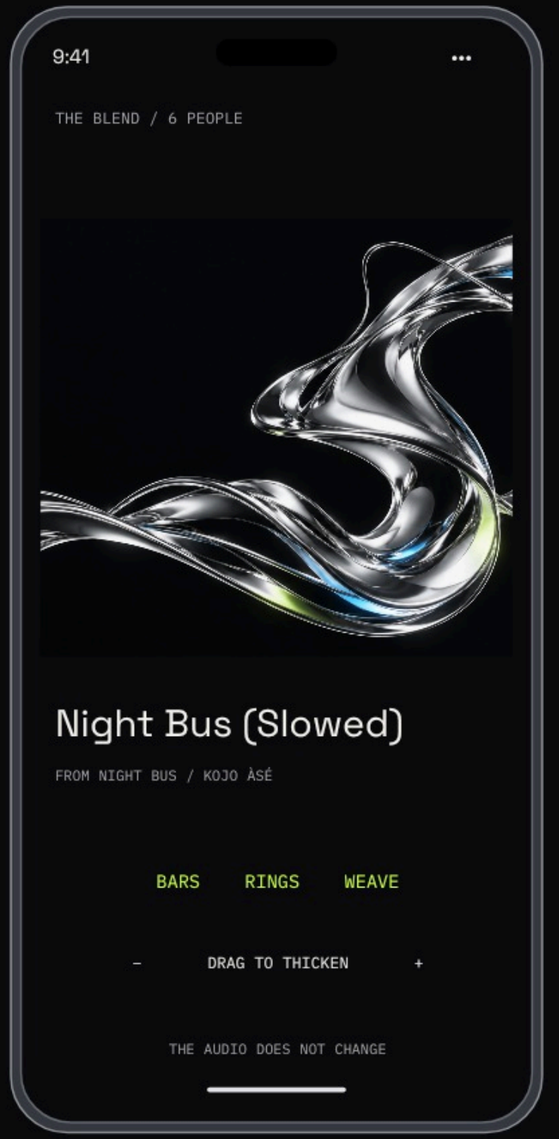

Send a flare. Let it bloom.

Watch the blend move

A visual expression of the room.
Choose a form. Change its density.
Hold to bloom.

BARS / RINGS / WEAVE

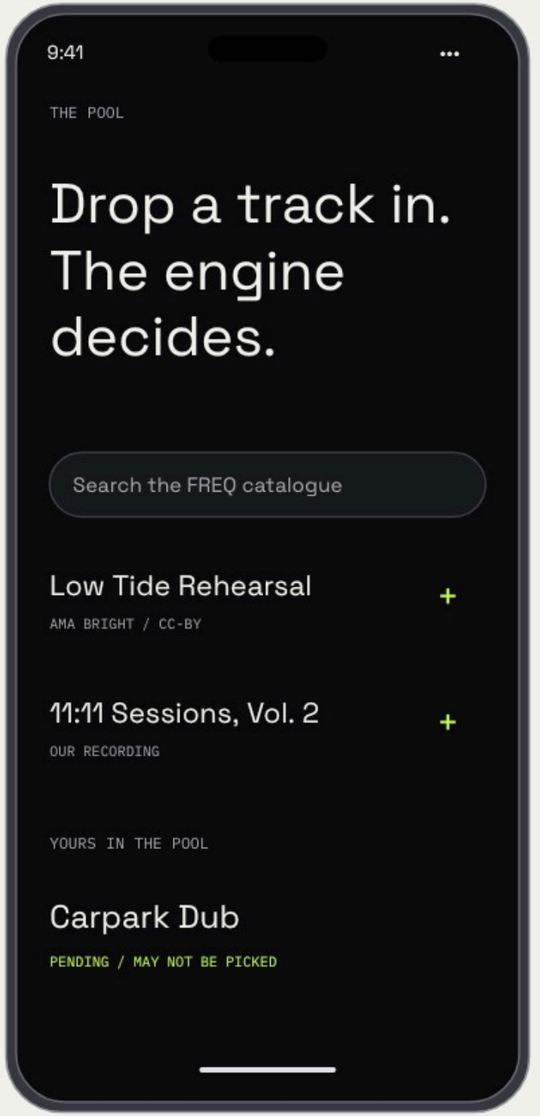

Visual changes leave the audio unchanged.

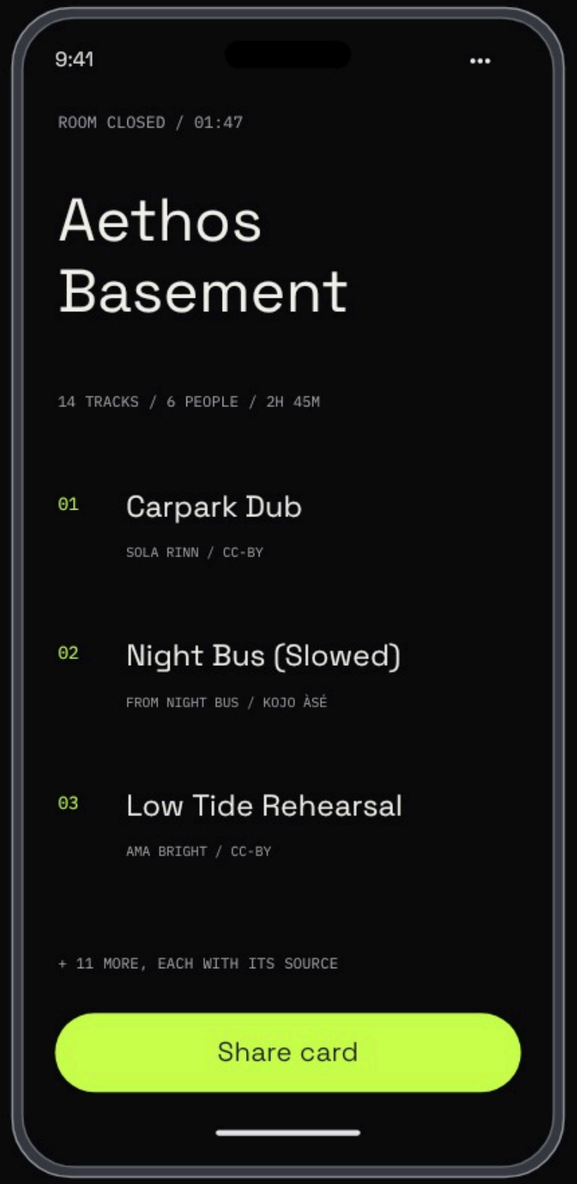

Offer a track.
Let the engine pick.

Search the FREQ catalogue
and put a track into the pool.

A suggestion may never play.
It does not interrupt the current track.

A record of the night

See what played, who brought it and where it came from.

Share a card with every source named. The recap is not a saved playlist.

FREE MODEL

Free to find your FREQ.

Your first shared experience,
with a starter generation allowance.

01

Join a room

02

Match your taste

03

Generate together

Proposed model. Free generation allowance to be defined.

PAID MODEL / USAGE TOKENS

Pay for what you use.

Usage tokens are credits for music generation.

01

Top up

Add usage tokens.

02

Generate

Spend tokens as you create.

03

Keep track

See usage and remaining balance.

Proposed model. Token prices and usage units to be defined.

PORTO LABS

AI licensing.
Creation tools.
New ways for artists to earn.

Building tools that let people create with music while artists retain control and share in its value.

THE OPPORTUNITY

$3.3bn

Potential annual AI revenue uplift for music rightsholders by 2035

Goldman Sachs base-case scenario

Music in the Air 2026
